CYLINDER TWINNING BANDS

Your Beaver Cylinder Twinning Bands are an integral part of your life support system, and should be treated with as much care as the rest of your equipment. This product has been manufactured to stringent quality control regulations, to give you years of trouble free service, providing that they are assembled correctly and a few basic instructions are adhered to.

INSTRUCTIONS

PARTS LIST

2 x A 

4 x B 

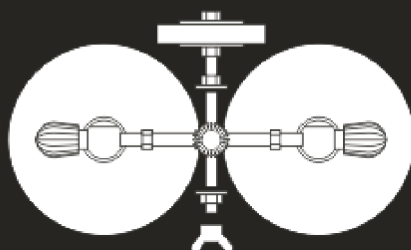

6 x C 

4 x D 

2 x E 

2 x F 

ASSEMBLED EXAMPLE

1. Assembly of this product must be carried out by a qualified technician, using two 13mm spanners.
2. Assemble cylinders with manifold / valves and boot as required ensuring that all component sizes are compatible.
3. If necessary, carefully drill two 8mm holes in the B.C.D. backplate and rear panel ensuring they are in a suitable location.
4. Insert 2 bolts A into 2 large washers B and through holes in the B.C.D. backplate.
5. Locate 2 large washers B followed by 2 nylock nuts C onto bolts A and tighten fully, ensuring they are not over tightened.
6. Locate 2 nylock nuts C onto bolts A, leaving a space of approximately 30mm from the B.C.D. backplate, followed by 2 small washers D.
7. Place bands E over pre-assembled twin cylinders with appropriate spacing to align with bolts A, ensuring that the cylinders remain parallel, under no circumstances should the cylinder manifold be bent.
8. Locate bands E onto bolts A, followed by 2 small washers D and either wing nuts F for ease of removal or nylock nuts as C for a more permanent fixing.
9. Adjust middle nylock nuts C to position cylinders correctly. Finally fully tighten end nylock nuts C, ensuring the cylinders are firmly held in place.

CAUTION

All watersports are potentially hazardous. Before using any water sports equipment you should be properly instructed and trained in its use by a recognised club or organisation.
